GPS Actuator

By Bernard Controls

The best way to find your electric actuation solution

- What is Fail Safe?

  For all part-turn applications, spring return FQ range actuators ensure the immediate
  and automatic opening or closing of the valve even without any power supply, as soon
  as an emergency signal is activated.

  This signal can be activated following:

  - an abnormal event (fire, overflow ...)
  - an automatic control
  - an operator's action
  - or the lack of power supply

  Examples of applications: storage and distribution of gas and dangerous liquids, fire
  protection systems, protection of chemical facilities, air conditioning and ventilation of
  hazardous areas.
